DOCTOR'S CAFÉ #19

Doctor's Cafe is a place for free and vigorous discussion and cross-disciplinary exchange with a wide variety of invited guests, including researchers, entrepreneurs, and investors from both inside and outside the university and from various fields. Anyone, not limited to doctoral students, who wishes to broaden their research and career perspectives and create a wide-ranging human network is welcome to attend. Please feel free to join us.

In Pursuit of Cute and Playable Robots

A graduate talks about her tumultuous 12 years

Ms. Yamamoto works for Yukai Engineering Inc., a venture company that develops warm products under the slogan "Robotics for Fun Living".

While searching for ways to cope with her own intractable disease, she created the Good Design Award-winning Petit Qoobo, a AMAGAMI HAM HAM that has become a media sensation, and continues to make things as a hobby. We interview her about her student life back then and her current business activities.
