

# Support for Pioneering Research Initiated by the Next Generation

## 次世代研究者挑戦的研究プログラム

TUAT aims to cultivate "true science-based advanced innovation leaders" who have a cross-sectional view of agriculture and engineering, and who can lead research and technology development in collaboration with other research fields, in order to solve global issues facing humanity in the 21st century and to contribute to the achievement of the Sustainable Development Goals (SDGs).

As part of this cultivation, we will provide financial support for research expenses and research incentives to living expenses for doctoral students, as well as a variety of career development, training contents to strengthen cutting-edge research capabilities and support diverse career paths.

This program is one of the projects by the Japan Science and Technology Agency (JST) to support doctoral students to lead the future of science, technology, and innovation in Japan
